Company Profile

NAVEED CLUF INDUSTRY

*Manufacturer, Importer of
Chemicals Dyes & General Order Supplier*

TEXTILE AUXILIARIES

Pre-Treatment

NCI auxiliary chemical product range contains, all necessary chemicals for pre-treatment. These products can be produced in different properties and concentrations according to needs Pretreatment: Detergent, wetting agents, Enzymes, scouring agents, Enzyme desizer Bleaching activators and stabilizer

Dyeing/Printing

The quality standards in the textile industry are constantly increasing. Besides level, even dyeings and reproducible color shades textile dyeing also requires good color fastnesses.

Finishing

Textile finishing provides fabrics, yarns and fibers with special properties. This includes water and oil repellency, antistatic behaviour and flame retardancy but also soft handle, luster, wrinkle resistance and anti-slipping properties can be achieved.

ABOUT US

HISTORY: NCI CHEMICAL was established in 1972 in a famous Textile city of Pakistan called Faisalabad. The company started from trading of textile auxiliaries and is today NCI chemical is one of the most reputed manufacturers, exporters and suppliers of superior quality of printing, dyeing chemicals and specially chemicals for the textile industry.

Quality Management: Our journey is Total Quality Management-fully satisfying our customers requirements through a process of continuous improvement. It's critical to understand that Total Quality Management is not a short-term program. It's a long term commitment aimed at continuously improving the way we work, providing a safe work environment, managing our business processes.. It is our goal to posture our company for market expansion.

Team

We are a team of highly dedicated professionals, who are committed to produce products and services that can exceed customer expectations at all levels. The team includes semi skilled, skilled and chemical engineers, who are highly experienced and qualified and understand the different requirements of our clients.

The management works under the able guidance of Mr. Khawaja Tahir, who has more than 15 years of experience in textile processing industry.

Infrastructure

We are based in Karachi and Faisalabad, Pakistan, with state-of-the-art infrastructure facilities. We have adopted latest machines and technology to ensure production and supply of quality products free from any defects. The production capacity is highly flexible, which make us capable to meet bulk and immediate requirements of our clients.

R & D

We have a well-equipped research department, which is backed by a team of experienced professionals for development works as far as new products are concerned. The team works towards continuous improvement of existing product line & introducing new products to keep pace with changing trends and competition products categories

Pretreatment:
Dyeing & Printing:
Finishing:
Special Additives:

Detergent, wetting agents, Enzymes, scouring agents, Enzyme desizer and stabilizer
Leveler, dispersant, chelating agent carriers and dye fixing agents.
Softeners, wrinkle-free agents, anti-static agents.
UV absorbers, flame retardants, anti microbial agents.

PRE-TREATMENT

PRODUCT LIST	DISCRIPTION
VINALASE PK CONC	Enzymatic auxiliary for the destruction of remaining peroxide after bleaching
VINALASE PK 400	Enzymatic auxiliary for the destruction of remaining peroxide after bleaching.
VINALASE DHT CONC	Heat-stabilized bacterial amylase for starch decomposition desizier
VINALASE DHT 100	Heat-stabilized bacterial amylase for starch decomposition desizier
VINAPOL GRN	Low-foaming stain remover and washing agent, without APEO.
VINAPOL GR(C)	Low-foaming stain remover and washing agent, without APEO.
VINAPOL GR(L)	Detergent & Wetting agent (APEO Free).
VINAPOL NSD	High alkali stable wetting agent for pretreatment and dyeing.
VINAPOL DEO CONC	Vinapol deo conc is a low foam scouring and soil suspending agent with wide use in a variety of textile processing situations.
VINAPOL ESG	Scouring and Stain removing agent (APEO Free).
VINAPOL SRD	Anti-backstaining auxiliary for application in desize,stone-wash and aftertreatment of denim to reduce backstaining
VINAPOL ABS	Scouring and Stain removing agent (APEO Free).
VINADEFOAM CONC	Anti-Foaming agent for various textile applications.
VINAZYME PW	Cellulase for the stone wash look of indigo dyed jeans articles..
VINADEFOAM AF 150	Anti-Foaming agent for various textile applications
VINAPOL VAM	VINAPOL VAM is a low foam scouring and soil suspending agent with wide use in a variety of textile processing situations specially for Silicone oil remover
VINASTAB DSP	Alkaline stabilizer for peroxide bleaching.
VINAQUEST CEP	Sequestering agent for pretreatment and anti zipper.
VINASPERSE SMS	Universal dispersing agent for all dyeing purpose
VINABRITE EHX	Optical brightener for cellulose and polyamide fibres..
VINABRITE ESK	Optical brightener for cellulose and polyamide fibres for high temperature
VINABRITE BCB-LIQ	Optical brightener for cellulose and polyamide fibres for peding
VINABRITE ESR	Whiteining agent for polyester and its blend.(nutral)
VINABRITE PTL	Mainly used in whitening of polyester fabric and its blends as well as acetate fiber for bright blue and purple shade
VINABRITE CXT	Optical brightener for cellulose and polyamide fibres.
VINABRITE BKF	Optical brightener for blue tinged white shade
VINABRITE BCB	Optical brightener for cellulose and polyamide fibres.

DYEING

Product list	DISCRIPTION
VINABID LRD	Dispersing agent improving the solubility of reactive Dye stuffs, sequestrant and dye conditoning agent.
VINAPAN RAP	A Dye accelerator for atmospheric dyeing and high temperature evelling of polyester.
VINABID LDP	Levelling agent for dyeing mainly PES but also acetate, triacetate and polyamide fibers with disperse dyes.
VINASPERSE PDN	Vinasperse pdn is an extremely efficient soaping agent for removal of hydrolysed reactive dyes.
VINAFIX DR	Cationic after Fixing agent for reactive dyes.
VINAFIX WRF	polyurethane base wet rubbing fastness.
VINAFIX FF CONC	The product will produce a marked improvement in fastness to Washing, Perspiration and Wet Contact Staining.(Highly concentration)
VINAWASH DAP	Vinawash dap is an extremely efficient soaping agent for removal of hydrolysed reactive dyes.
VINAWASH SA	surfactent free washing off for reactive dyeing.
VINAWASH PVW	Surfactant-free special product for removing reactive dyestuffhydrolyzate from reactive dyeing and prints in liquors containing electrolytes
VINALUBE HC	mixture of polymer anticrease for all fibres
VINALUBE PBA	Wet waxing agent for yarns.
VINALUBE NCC	polyethelene base anti creasing agent.

PRINTING

Product list	DISCRIPTION
VINAWASH WOD	preventing agent for white tinting effect for print and reactive disperse.
VINAFIX LF	Auxiliary for increasing the fastness level of pigment prints.
VINAFIX LFC	Auxiliary for increasing the fastness level of pigment prints(Highly concentration).
VINAQUEST SF 40	Multipurpose complexing agent for dyeing bath.

FINISHING

PRODUCT LIST	DISCRIPTION
VINAZYME G300	Cellulase bio-polish enzyme.
VINAZYME G CONC	Cellulase bio-polivsh enzyme.
VINASIL HP CONC	VINASIL HP CONC is a 4th generation hydrophilic silicone softener which imparts a durable handle without impairing thewater absorbency of treated textiles unlike traditional amino functional silicone softeners.
VINASIL CNC 101	VINASIL CNC 101 is a 4th generation hydrophilic silicone softener which imparts a durable handle without impairing the water absorbency of treatedtextiles unlike traditional amino functional silicone softeners.
VINASIL FP 70	VINASIL FP 70 is a 4th generation hydrophilic silicone softener which imparts a durable handle without impairing the water absorbency of treated textiles unlike traditional amino functional silicone softeners.
VINASIL FE CONC	Novel silicone softener for finishing of textile fabrics. (Macroemulsion)
VINASIL FE	Novel silicone softener for finishing of textile fabrics. (Macroemulsion)
VINASIL PRO	Novel silicone softener for finishing of textile fabrics. (Macroemulsion)
VINASIL ME CONC	Softener and additive for the final finish of textiles, preferably used for padding mangle applications (Micro emulsion)
VINASIL ME	Softener and additive for the final finish of textiles, preferably used for padding mangle applications (Micro emulsion)
VINASIL ME 44	Softener and additive for the final finish of textiles, preferably used for padding mangle applications.(semi Micro emulsion) specially for denim
VINASIL SM 44H	Softener and additive for the final finish of textiles, preferably used for padding mangle applications.(semi Micro emulsion)
VINASOFT NIS PASTE	NON-IONIC SOFTENER PASTE
VINASOFT NIS	NON-IONIC SOFTENER FLAKES.
VINALUBE BA	Wet waxing agent for yarns. (Yarn lubricant)
VINASOFT PEN	Non-ionic sewing additive and raising softener.
VINASOFT PUR	Self-crosslinking polymer for finishing technical textiles, suitable for all fiber types and blends.
VINASOFT CSF	smild cationic softener flax for all types of fibres. (Flakes)
VINASOFT CSF PAST	mild cationic softener flax for all types of fibres. (past)
VINALUBE	High density polyethylene wax emulson.
USW	mixture of a contensate fatty easter base softener
VINASOFT NDS	Homo polymer of polyethylene and Fatty Acid Condensate(Paste).
VINASOFT FT	Fatty acid condensate with functional elastomeric compound.
VINASOFT SEW	Finishing and weighting agent..
VINASOFT WA	
Silicone oil NC 101	Silicone oil in primary form
Silicone oil 4GM	Silicone oil in primary form
Silicone oil 4GE	Silicone oil in primary form
VINASIL SR 705	Silicone compound Softener for polyester cotton, CVC and bland fabric high shear stable Hydrophilic specially for polar fabric.
VINASIL SR 709	Silicone compound Softenerfor polyester cotton, CVC and bland fabric high shear stable Hydrophilic specially for polar fabric.

OTHER CHEMICALS

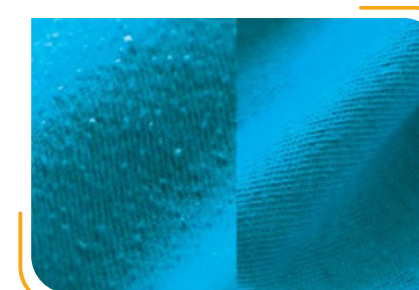

Product list	DISCRIPTION
VINALUBE BA	Wet waxing agent for yarns.(Yarn lubricant)
VINASOFT PEN	Non ionic sewing addictive and raising Softener
VINASIL ME 44	Softener and additive for the final finish of textiles, preferably used for padding mangle applications.(Micro emulsionm specially for denum fabric)
VINAZYME PW	Cellulase for the stone wash look of indigo dyed jeans articles.
VINALASE DHT 100	High-stabilized bacterials amylase for strach decomposition desizier
VINAZYME G 300	Cellulase bio-polish enzyme.
VINAPOL NSD	High alkali stable wetting agent for pretreatment and dyeing.
VINASPERSE SMS	Universal dispersing agent for all dyeing purpose
VINASIL SR 709	Silicone compound Softener for polyester cotton, CVC and bland fabric high shear stable Hydrophilic specially for polar fabric.
VINAPOL VAM	VINAPOL VAM is a low foam scouring and soil suspending agent with wide use in a variety of textile processing situations specially for silicone oil remover.
VINAPOL ABS	Anti-backstaining auxiliary for application in desize,stone-wash and aftertreatment of denim to reduce back staining
